

RumenWorks Calving Preparation Lick

RumenWorks Calving Lick is designed to assist with the preparation of heifers and cows for calving and the problems associated with birth.

- ▶ Contains a pre-calving blend of anionic salts.
- ▶ A balanced profile of vitamins and minerals.
- ▶ Used as directed this product may assist in preventing milk fever and the metabolic problems associated with calving.

Why Use RumenWorks Calving Lick?

- ▶ **FACT:** Contains high levels of Vitamin E to assist immunoresponse, or the cow/heifers ability to fight disease.
- ▶ **FACT:** The anionic salts lower blood pH which, through a series of internal processes, leads to mobilisation of calcium and phosphorus. The resulting higher blood calcium concentrations stimulate muscle contractions which helps prevent post calving metabolic disorders such as milk fever.
- ▶ **FACT:** Vitamin D3 have a very important role in ensuring Calcium balances are correct in early lactation.

Nutrients:

✓ Vitamin A	✓ Iodine	✓ Magnesium
✓ Vitamin D3	✓ Manganese	✓ Calcium
✓ Vitamin E	✓ Zinc	✓ Chloride
✓ Chromium	✓ Copper	✓ Sulphur
✓ Cobalt	✓ Selenium
